

Press release

PORR S.A. to build the offshore part of the installation terminal for Baltic Sea wind farms in Świnoujście

Warsaw, 29.12.2023 - Over the next 18 months, in the seaport of Świnoujście, we will be building the hydrotechnical part of the terminal supporting the construction of the first Polish wind farm known as the Baltic Power. This key project for the Polish energy sector will ensure the supply of clean green energy to 1.5 million households. We signed the PLN 138 million contract with Zarząd Morskich Portów Szczecin i Świnoujście S.A. [Szczecin and Świnoujście Seaports Authority]. The construction site has already been handed over.

The construction of the installation terminal in Świnoujście is part of a key project for the Polish economy which focuses on energy transition towards the use of renewable energy sources, in particular from offshore wind farms. When completed, the terminal will be one of the most modern facilities of its kind in Europe. It will enable the installation of more than 80 offshore wind turbines per year and will be able to support the Baltic Power project as well as other planned investments.

As part of the investment, PORR S.A. will build elements of the terminal's seaport infrastructure to adapt the quay to handle jack-up vessels. These specialised vessels will be used to transport state-of-the-art wind turbines composed of 150m long components which will be delivered by sea to the installation site after initial assembly at the quay. The terminal will also allow for the storage of other cargo of above-standard size and weight.

The scope of our work includes

- extension of quays 1 and 2 along 500 m,
- dredging of the entrance channel and seaport basin bringing ships to the quay to 12.5 m,
- the construction of quay no. 3 along approximately 300 metres, allowing for the further development of the installation terminal in the future.

Facts and figures in a nutshell:

Project type:	Building the transshipment capacity of the Świnoujście seaport to handle offshore wind energy needs
Scope of work:	Build
Client:	Zarząd Morskich Portów Szczecin i Świnoujście S.A.
Contractor:	PORR S.A.
Project value:	PLN 138 million net
Deadline:	Second half of 2025
